## Plug-In Meter Base Adapters

### **Meter Socket Adapters – Plug-In Meter Testing Bases**

**600-MB1: Plug-In Meter Testing Base**  
Provides both the current and voltage test points for testing installations using Form 3S and 4S Meters. Current test points are self-shorting while voltage test points utilize banana jacks. Normally used on installations where no test switches are installed.

**600-MB2: Plug-In Meter Testing Base**  
Provides both the current and voltage test points for testing installations using Form 5S Meters. Current test points are self-shorting while voltage test points utilize banana jacks. Normally used on installations where no test switches are installed.

**600-MB3: Plug-In Meter Testing Base**  
Provides both the current and voltage test points for testing installations using Form 6S, 8S and 9S Meters. Current test points are self-shorting while voltage test points utilize banana jacks. Normally used on installations where no test switches are installed.
