Recondition Your Older Bird Dog Plus and Get a Lithium Ion Battery Upgrade

By reconditioning your Bird Dog Plus, you will receive the latest firmware and hardware configurations, 130% more battery capacity, and a new front panel—an updated Bird Dog Plus for much less than the price of a new one!

By now, your Bird Dog Plus has more than paid for itself. Now you can essentially upgrade your older Bird Dog Plus unit to the latest configuration for much less than a new unit, and start fresh! In addition, you will get a longer life lithium ion battery, providing you with **130% more capacity**.

Additional benefits include:

- **Upgrade your firmware and receive the latest features of a new Bird Dog Plus**
- **Upgrade your hardware (digital and analog boards) to the latest configuration for enhanced reliability**
- **Trickle charge smart charger—Cannot overcharge—Leave it plugged in as long as you want**
- **Longer battery life—In addition to the increased charging capacity, the smart charger ensures the batteries are fully charged and will last longer**
- **Charges directly from the front face of the Bird Dog Plus—Easy to attach connector. Impossible to attach the wrong charger to the Bird Dog Plus**
- **Reduced charging time—Only 5 hours to fully charge a Bird Dog Plus from a dead battery. Older units took as long as 18 hours!**
- **Significantly reduced battery memory issues with the new discharge circuit built into the Bird Dog Plus units. Additionally, LION batteries are less prone to memory issues than other batteries.**
- **Color codes on the chargers to show charging status:**
 - **Red—Charging**
 - **Green—Trickle charge or maximum capacity**
